

SOA Architect Certification Self-Study Kit Bundle

A Certified SOA Architect has demonstrated proficiency in the mechanics of service-oriented computing through the mastery of patterns, principles, practices, and industry technologies required to engineer modern service-oriented solutions.

This certification bundle provides you with the self-study materials you need to prepare for the exams required to complete the SOA Architect Certification.

The bundle includes the following self-study kits:

Self-Study Kit for Exam S90.01:

Fundamental SOA & Service-Oriented Computing

An overview of key concepts, terminology, technologies, benefits, and impacts of SOA, service-oriented computing and service-orientation.

Self-Study Kit for Exam S90.02: SOA Technology Concepts

A study of the primary technologies used to build service-oriented solutions, with an emphasis on XML and modern Web-based services technologies.

Self-Study Kit for Exam S90.03: SOA Design & Architecture

An exploration of the service-oriented architectural model and the service-orientation design paradigm, including in-depth coverage of service compositions and runtime service roles.

Self-Study Kit for Exam S90.08: Advanced SOA Design & Architecture

A comprehensive study of SOA in practice focused on advanced topics associated with the application of SOA design patterns, practices, techniques and service-orientation design principles.

Self-Study Kit for Exam S90.09: SOA Design & Architecture Lab

A hands-on lab during which participants apply the patterns, models, concepts, techniques, and principles covered in previous courses in order to complete a series of architectural and service design exercises.

For more information, visit www.soaschool.com and www.soacp.com.

By purchasing these kits as part of this bundle you receive a 20% discount. To purchase a certification bundle you are not required to purchase all five self-study kits at the same time. You can purchase self-study kits one at a time and after purchasing the fourth kit you will receive the fifth self-study kit at no charge (except for shipping).

Please note that the bundle does not include the required text books listed below: SOA Principles of Service Design, SOA Design Patterns, Service-Oriented Architecture: Concepts, Technology, and Design. These text books can be purchased separately or together with individual self-study kits or with the bundle when placing an order.
