

SOA Consultant Certification Self-Study Kit Bundle

A Certified SOA Consultant is required to obtain a balanced proficiency in a cross-section of the most important topic areas, with an emphasis on concepts, principles, practices, and technologies associated with service-oriented computing and service engineering.

This certification bundle provides you with the self-study materials you need to prepare for the exams required to complete the SOA Consultant Certification.

The bundle includes the following self-study kits:

Self-Study Kit for Exam S90.01: Fundamental SOA & Service-Oriented Computing
An overview of key concepts, terminology, technologies, benefits, and impacts of SOA, service-oriented computing and service-orientation.

Self-Study Kit for Exam S90.02: SOA Technology Concepts
A study of the primary technologies used to build service-oriented solutions, with an emphasis on XML and modern Web-based services technologies.

Self-Study Kit for Exam S90.03: SOA Design & Architecture
An exploration of the service-oriented architectural model and the service-orientation design paradigm, including in-depth coverage of service compositions and runtime service roles.

Self-Study Kit for Exam S90.04: SOA Project Delivery & Methodology
An overview of the SOA project delivery lifecycle, project delivery strategies, and project roles and responsibilities, plus a detailed introduction of service-oriented analysis and service modeling.

Self-Study Kit for Exam S90.05: SOA Technology Lab
A hands-on lab during which students apply and work with industry SOA technologies through a series of tutorials and exercises.

For more information, visit www.soaschool.com and www.soacp.com.

By purchasing these kits as part of this bundle you receive a 20% discount. To purchase a certification bundle you are not required to purchase all five self-study kits at the same time. You can purchase self-study kits one at a time and after purchasing the fourth kit you will receive the fifth self-study kit at no charge (except for shipping).

Please note that the bundle does not include the required text books listed below: SOA Principles of Service Design, SOA Design Patterns, Service-Oriented Architecture: Concepts, Technology, and Design, Web Service Contract Design & Versioning for SOA. These text books can be purchased separately or together with individual self-study kits or with the bundle when placing an order.
